- ◆ Golf Courses
- ◆ Retail
- ◆ Wineries
- ◆ Convenience
- ◆ Grocery
- ◆ Café/Bakery
- ◆ Craft Brewery/Liquor
- ◆ Self-Serve Kiosk

Brief History of the Software Development Process

UniversalPOS was first introduced in 1988 as a DOS package called the Retailers Advantage. The Retailers Advantage was a very popular package in the general purpose retail markets and continues to operate to this very day in many locations in the Niagara Region of Southern Ontario. In 1997, development began on our Windows based system, UniversalPOS, which was officially released in 2000. Again, initially released as a retail package, its success was immediate and quickly proved to be a popular choice in Ontario. Through the next five years, interfaces were developed for Quick Service, Fine Dining and Wineries.

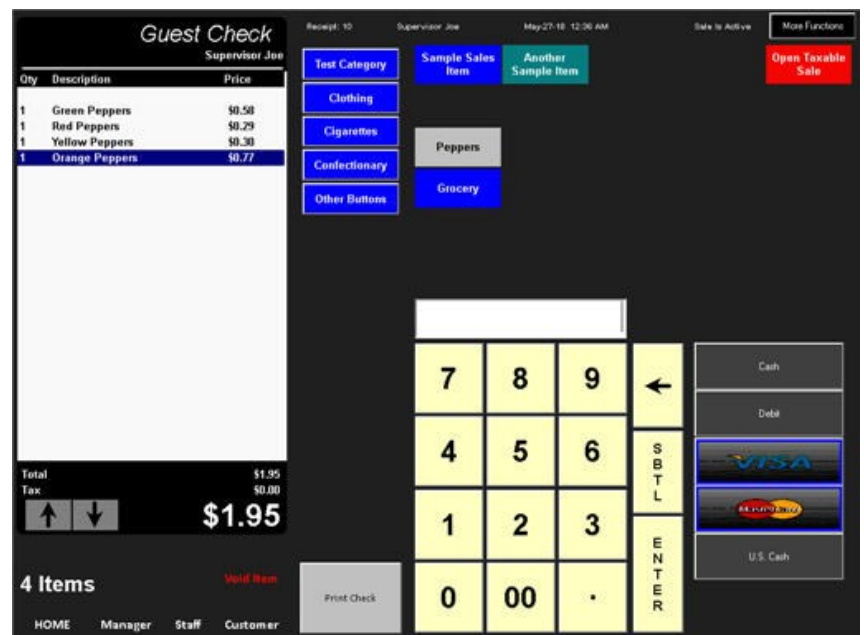

UniversalPOS has grown to become an industry leader in the development of Point of Sale solutions. Working alongside our dealer network, UniversalPOS continues to break new ground in Point of Sale development. Our network of dealers through-out North America are all UPOS Certified and fully trained as a UniversalPOS Partner to support and install the platform.

UniversalPOS is now sold in Canada, USA, Caribbean and UK.

Pay Screen Sample

Invoicing Module

For those customers who make sales through the back of the house as well as the front, UniversalPOS again is the solution. Our integrated Invoicing Module allows for back office sales using a format similar to that offered by most major accounting packages.

- ◆ process sales and generate , print & email invoices
- ◆ receive payments on account by specific invoice
- ◆ print aged accounts receivables (current, 30,60, 90)

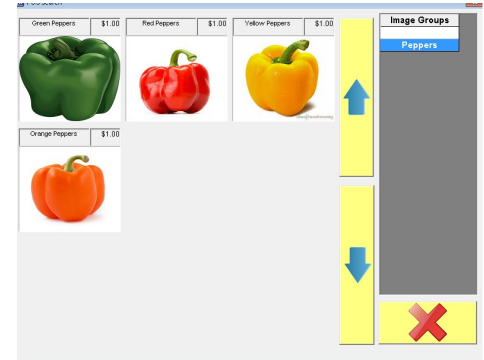

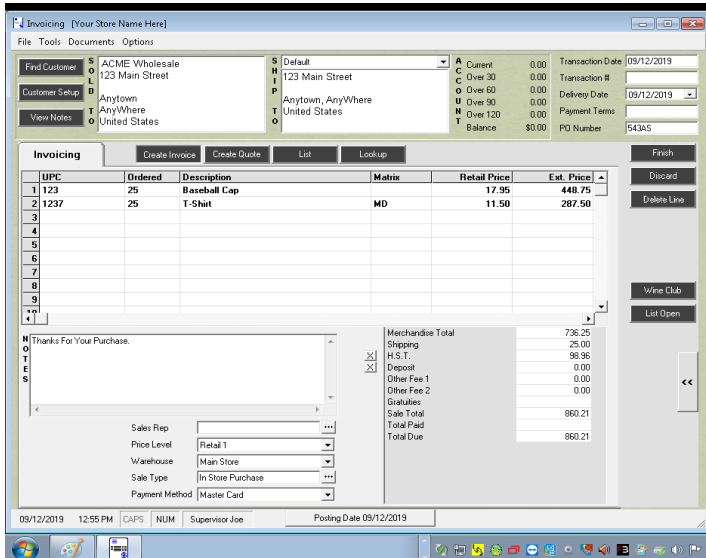

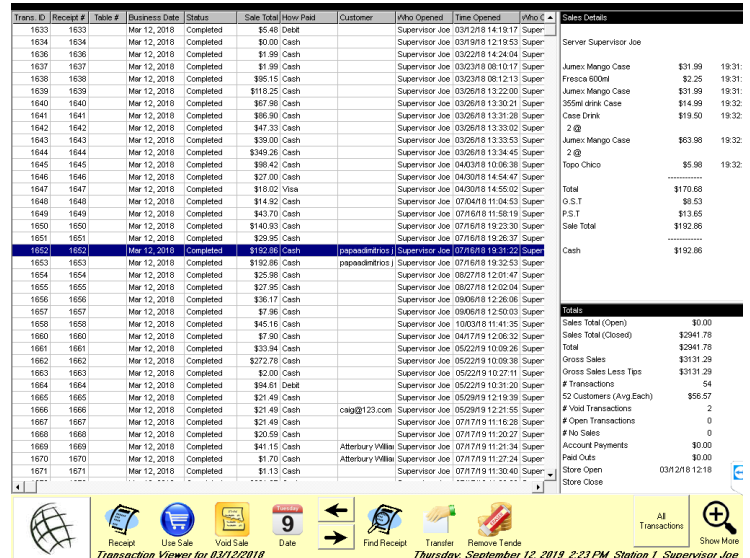

Image Search Screen Sam-

Invoicing Module Screen Sample

Transaction Viewer Screen Sample

Transaction Viewer

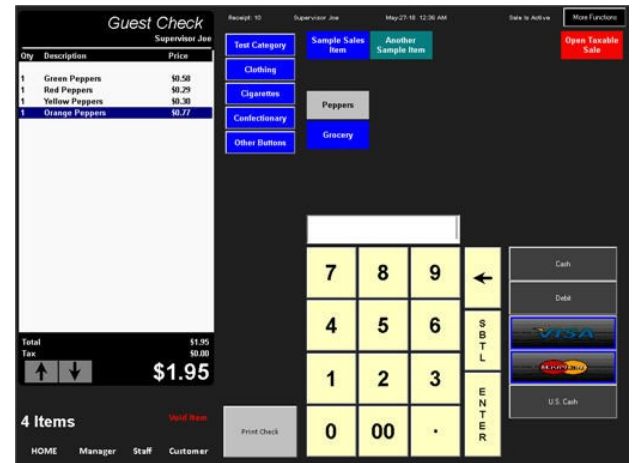

- ◆ quickly view & edit transactions from the current or previous day
- ◆ quickly reprint any sales receipt from any day

Inventory Control

Control over your inventory is key in maintaining a healthy bottom line and good cash flow in any business. The UniversalPOS system monitors your purchases and your sales through our point of sale and our stock ordering processes. Learn what stock levels you should be maintaining for each item and what items are giving you.

- ◆ purchase orders
- ◆ physical inventory adjustments
- ◆ quick stock receive
- ◆ three suppliers for each product
- ◆ automatic sale pricing
- ◆ mix & match or six tier pricing
- ◆ track stock through 15 warehouses
- ◆ recipe and ingredient tracking
- ◆ portable inventory data collector ready
- ◆ size or color matrix
- ◆ re-order minimum & maximums
- ◆ integrated label designer to print labels and barcodes
- ◆ shelf talkers

Grocery Screen Sample

Customer Tracking and Rewards

A customer is the most valuable commodity any business can have and making them return to your store more often is your bottom line. Our point of sale will track the purchases your customers are making, allowing you to monitor the buying habits of your customers. Keep your customers coming back with reward points. We offer reward point systems based on the amount of money customers spend at your store or based on the products they purchased. Either way your customers will be back to redeem their points on future purchases. Our accounts receivable system provides a simple aged accounting system with monthly statements. You can quickly and easily process account charges and payments from the point of sale.

Sales Tracking

Let UniversalPOS teach you more about what you are selling. Track what you are selling, when you sold it, what you paid for it, and what you sold it for. Learn if you are not making a large enough margin for a product based on the square footage it occupies in your store. Track your sales for commissions to bus drivers or to employees. By utilizing our time and attendance features, your sales and labor costs can be tracked together. Compare sales by month/day or same period last year.

Employee Time-Attendance & Scheduling

Our time and attendance has integrated a Time Clock and Staff Scheduler right into your point of sale system. This allows for greater control of labour costs, as well as tighter security on who has access to the system. Create reports on Sales versus labour for specific periods. The time clock allows managers to adjust shift start and end times just in the event employees forget to clock in or out.

- ◆ integrated staff scheduling
- ◆ employee access code expiry forces management and staff to change their employee codes
- ◆ POS mail system keeps you and your staff informed

Universal ready for Wineries and Craft Brewery

Winery Features

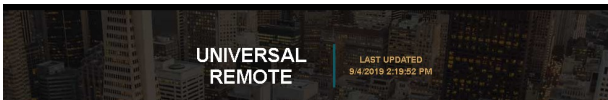

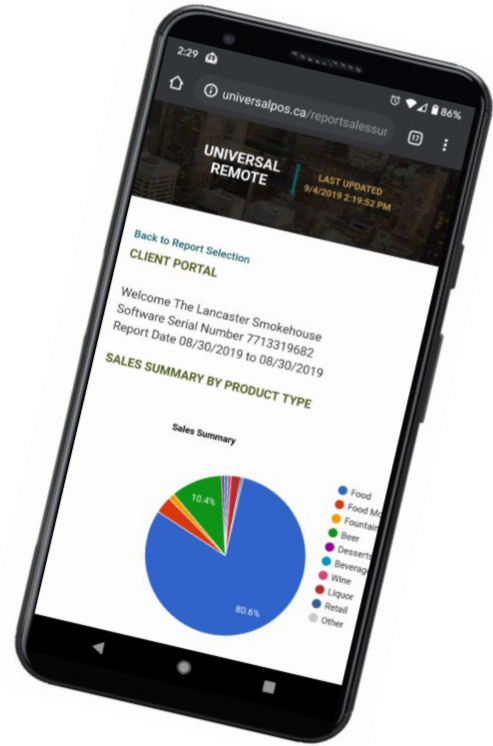

- ◆ automatic calculations for licensee & export pricing
- ◆ special price calculator per region

The screenshot shows a POS interface for a 'Guest Check' by Supervisor Joe. The interface includes a product grid with categories like FRESH PRODUCE, MEATS, Confectionary, Beverages, Merchandize, Groceries, and Bulk. Each category contains images of various items such as Apples Red, Grapes, Apples Green, Bananas, Strawberries, Pomegranate, Lemons, Tomatoes, Onions Red, Avocado, BokChoy, and Carrots. On the right side, there are buttons for 'Product List', 'Open Item % Discount', 'Coupon 5\$ Off', and 'Customer Discount'. At the bottom, there are buttons for 'Price Change', 'Refund Next Item', '1 @', 'Item Info', 'Hold / Recall Order', 'Print Receipt', and a prominent 'Pay Now' button. The top right corner has a 'More Functions' button. The bottom left shows '0 Items' and a 'Scale' button. The bottom navigation bar includes '< HOME', 'Manager', 'Staff', and 'Customer' options. The tax amount is shown as \$0.00.

- ◆ Phone Notifications
- ◆ Customer Email Collection
- ◆ Reward and Loyalty Programs

Keep your customers in front of your own brand and stop paying huge commissions for them to order your food online!

Testimonials

Quick Service Testimonial

We had some difficulties in 2016 in getting accurate information from our Old POS System. System Crashed quite often and very unreliable. Someone gave us the number to call to Digi Technologies to get some help, they suggested us to go with Universal POS. They demonstrate all the features available in the software. Thanks God we did the right decision to replace our Old Pos with Universal Point of Sale Software.

Wallace Smith, Paradise Ice Cream & Smoothies, Hamilton

Hospitality Testimonial

I am very happy with the Services they provided at my Restaurant. The Universal POS Software is excellent and user friendly. I would highly recommend them to anyone looking to get New POS or POS related Services.

Tom, Owner Rise & Dine Restaurant Toronto.

Pizza Testimonial

"Here at Your Neighborhood Pizza Company we have just upgraded to the newest version of UniversalPOS. We are a very busy restaurant with many things going on at the same time, delivery, dine in, and take out. For all my 30 years in the restaurant business this system is the best for all my operational needs. It provides me with a ton of flexibility. I have used other systems like Pixel Point, Posi- Touch, and Aldelo, and none of these systems can compare. Our restaurant in Myrtle Beach is in the process of changing over from Aldelo to UniversalPOS in the coming months".

Retail Testimonial

We purchased the Universal POS system from Orca Dynamics several years ago and can't rave enough about it! It offers everything we need for our diverse gaming cafe business - from retail, to gaming activities and services, to food and drink. It is quick to learn and easy to input information into. I'd call it pretty much 'idiot-proof', lol. We use a scanner for most of our retail stock, and for the rest we use the touch screen application to access POS buttons for products and services. There's an option for scale (weight) measurement, but we don't require that at this time. You can print labels, price tags, etc, and it provides a variety of report options, too. The set up and learning is well supported, and the support is amazing. The price point is extremely reasonable for all that you get with this system. I'm so pleased that we chose it. <http://gamesandgrounds.com/>

Games and Grounds, Alex Greenwood

Convenience Store Testimonial

We badly needed a Point of Sale System that could handle all our sales and day to day functions. Digi Technologies provide us Universal Point of Sale Software with all hardware and related peripherals. System is doing great and we are totally trouble free as they are quick in answering all our questions.

Tindahan Convenience & Foods Toronto, Owner Anna

Winery Testimonial

"We've been in business 20 years and installed UniversalPOS. Without a doubt, it has helped us grow our business. Having the ability to track sales, run reports, prepare purchase orders with sales history and 'just on time ordering' and offer a frequent buyer program to our customers has helped us become the top selling store in the chain. The prompt and personal technical support they provide is very much appreciated. We highly recommend this affordable and reliable system to any new or existing business."
